

第12回CDB懇話会

Fritz Melchers

(Biozentrum of the University of Basel, Switzerland
Former Director of the Basel Institute of Immunology)

“The many unsolved problems of lymphocyte development:
After 30 year experience in the Basel Institute of Immunology”

Date:	Tuesday, November 9, 2004
Time:	17:00-18:00
Place:	1F Auditorium of Building C, CDB

利根川博士の遺伝子再構成の概念、Koehler博士のモノクローナル抗体技術、そしてJerne博士のネットワーク理論など、ノーベル賞に輝く業績を続々と生み出し、世界で最も成功した研究所として知られているバーゼル免疫学研究所の所長を長年勤められた Fritz Melchers博士にお願いして、懇話会を開きます。奮ってご参加ください。

The Basel Institute of Immunology is known as the most successful institute in the world because of remarkable performance in research including those of three Nobel laureates; Susumu Tonegawa, gene rearrangement; George Koehler, monoclonal antibody; and Niels Jerne, idiotypic network theory. It is our great pleasure to be able to have Dr. Fritz Melchers who was the director of this institute in CDB “Konwakai”, a seminar series of distinguished scientists. Many participants will be very much appreciated.

The presentation will be given in English.
